About Me

Dented Code

Narendra Sunar is a seasoned full-stack engineer with expertise in React, Ruby on Rails, and Node.js, spanning over 6 years in software development. Passionate about impactful web applications, he mentors junior developers with enthusiasm, finding it a rewarding investment of his time. Narendra's teaching extends to HTML and CSS basics, where he employs interactive methods like hands-on coding and PowerPoint slides. Recently, he's delved into CSS animations and integrating tools like Intro.js into React applications. With a knack for detail, Narendra refines his coding style with features like Flow for type checking, demonstrating a commitment to robust and efficient development practices.
